Association genevoise pour la protection de la nature et al.
Vernex, Jean-Claude (1996),
Geneva by foot. It’s quick and easy.

Please, be careful again...
The banks of the Rhone are part of a highly valued habitat. A walk of this kind normally is enabling one to see, to touch and to discover the wildlife. These banks are a veritable biological corridor through the Canton and home to many animal species. You will be able to witness a cave of bats and, in certain, the thousands of ducks that totter along its banks. Since, in winter, the Rhone is fed by the Rhone, the pearl of the lake, it is not to be missed out. To go along in the walk, is to quench thirst marvelously waters… through pranks and high tides.

The newest route is a mix of technology and nature. Dams, technology and nature

Baths of Pâquis

My ancestor, a structure measuring 84 x 71 feet, was purchased in 1788 and moved in 1897, reflecting the need for more space.

The bath complex located between two roads and the Rhone was originally located in 1620 near the Bergues footbridge. In 1738, a bath house was built near the quay.

The halls heading up to the French Revolution were fronted with a grove of lime trees. In 1838, the Grand Hotel des Bains was opened.

The palais wilson, with its theatre, concerts and café, is the largest and most prestigious palace along the quay.

Sciences, the only one of its kind in Switzerland. Geneva's most beautiful building was erected here in 1868, although 1889 marks my real birth.

I am the neo-classical building located upstream from the Forces Motrices (Power Station) Building.

In 1970, while being enlarged, I was unfortunate to suffer footbridge and esplanade joining the two banks and a ladder for passengers to get on and off the water bus.

I have a long history of influence on the city. In the 16th century, I was a panoramic view, an idea conceived by the architect Charles Garnier.

The Lavaux Wine Route

A village and a wine region founded over 2,000 years ago. The Lavaux region is located on the east side of Lake Geneva.

The Palais de Justice

I am a 13th-century building with a 100-foot spire, located near the old city walls.

In 1906, I was moved to the site of the old town hall. The architect Charlotte Brun designed my modern facade.

I have been the site of many important events in Geneva's history.

The Palais des Nations

I was built in 1934 and is the seat of the United Nations Office at Geneva.

I have been a UN office since 1943, when the League of Nations moved here.

I house the headquarters of the World Trade Organization.

I house the International Labour Organization.

I house the International Telecommunication Union.

I house the World Intellectual Property Organization.

I house the World Meteorological Organization.

Belle-Isle

I was the site of a pilgrimage church, a small chapel built in 1230.

In 1448, I was converted into a hospital.

In 1815, I was transformed into a theater.

In 1923, I was restored after a fire.

The Rive Gauche

I was the site of a medieval church, a small chapel built in 1230.

In 1448, I was converted into a hospital.

In 1815, I was transformed into a theater.

In 1923, I was restored after a fire.
